

## **Springmead School**

### **2020-2021 Curriculum Plans**

Below are the long term plans to be used in the academic year 2020 -2021, to ensure appropriate breadth, depth, balance and progression of subject matter and learning skills across the school. The long term planning is reviewed each year by the Head of Studies, the Principal, Deputy and the teachers. The core values and ethos of the school are at the heart of the planning process. We use Curriculum 2014 for guidance. Numeracy and science are taught through the Abacus scheme.

We allow time in our curriculum to insert additional themes. It might be a subject inspired by a pupil (e.g. a child travelling to a different part of the world, or with particular hobby), a teacher (perhaps with a passion for a particular area of interest), a world/national event or a whole school enterprise.

Each term you will be sent more details of what will be covered in a class, and you are, of course, always welcome to ask the class teacher if you would like more information about what is being covered, or indeed have some knowledge or interest of your own which could be used in the delivery of the curriculum.

The skills of effective learning are taught through The Building Learning Power Programme.
